Using the Schedule:

1. Find your target letting date in the far right column.
2. Determine which deadline column(s) apply to your project:
 - a. For CMAQ/TAP funded projects, if a schedule, scope, or cost change is needed, or a deferred phase needs to be reinstated, refer to the "CMAQ/TAP Change Requests" date.
 - b. For all other federally funded projects, refer to the "TIP Revisions Due" column for the date by which your Planning Liaison or TIP programmer must submit TIP changes to CMAP.

When are TIP Changes necessary:

1. If the cost of the project phase seeking federal authorization differs from the amount programmed in the CMAP TIP.
2. If the project phase is seeking authorization in the current Federal Fiscal Year (FFY), but is programmed in the CMAP TIP in a different FFY.
3. If the project title, location, or scope has changed since initially entered in the TIP. FHWA will not authorize funds if the agreement description differs from the TIP.
